## SoftTrace

The new recessed Daybrite Softtrace will

fit into many architectural applications. It offers soft, even brightness across a subtle, architectural enclosure. Diffuse models are excellent high efficiency products that outperform current volumetric technology while reducing installation and maintenance costs and accommodating more applications. Perforated models bring a whole new category to the game – a product with the look of a basket luminaire, without the suspended basket to collect dirt/debris, and with significantly higher efficiency.

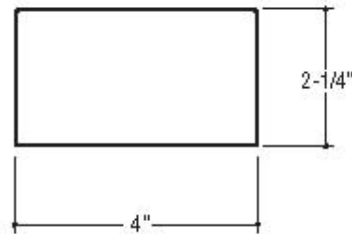

The Softtrace is available in 1x4, 2x2 and 2x4 sizes for grid, flange and z-spline ceilings utilizing T5, T5HO, T8 and Biax lamps.

luminous environments with optimal energy efficiency.

Only slightly bigger than a business card,

Suspended

Lamping Options	
T5HO	1, 2, 3
T5	1, 2, 3

Chopstick offers wide-spread lighting distribution and efficiencies up to 94.5%. Available in suspended and wall mount versions, Chopstick allows designers to achieve a consistently clean and simple look throughout the space. The high efficiency optical system provides direct/indirect distribution. The lower optics consist of flat acrylic panels with a layer of MesoOptics film while the upper optics consist of high performance Miro IV reflectors providing a wide spread batwing distribution.

Fixture scale, performance, lighting quality and budget – why

compromise? Chopstick by Ledalite offers small size with big lighting performance and a price point that makes it ideal for use in many different types of spaces. With Chopstick, lighting professionals can create more uniform

## AL-29-TRIO

The potential now exists for a wider range of in-ground lighting creativity. Trio's three independent optical assemblies are filed

adjustable up to 25 deg tilt and 360 deg horizontal rotation, with AIM-HOT capability. Fluorescent in Single or twin T5HO & 3/42TTT; Metal Halide up to 70watt; and LED (including RGB) available.
