

Leviton Z-Max Panel Daylight Savings Instructions

Step 1

Press the “MENU” Button on the master controller

Step 2

Press the up arrow button until you see “SOFTWARE BUILD” on the LCD screen.

Step 3

Press the “SELECT/SAVE” button

Step 4

Verify that the firmware version of the panel is above v1.40, example: “24MHzV1.40...” this is what you should be seeing on the LCD screen. If the version is below 1.40 you need to contact Spectrum Lighting to schedule an appointment for a firmware update on this panel. 608-222-3846, attn: John Lockwood

IF Firmware is V1.40 and above please continue.

Step 5

Press the “CANCEL” button

Step 6

Press the up arrow button until you see “TIME/DATE/ASTRO” on the LCD screen

Step 7

Press the “SELECT/SAVE” button

Step 8

Press the up arrow button until you see “SET TIME & DATE” on the LCD screen

Step 9

Press the “SELECT/SAVE” button

Step 10

Press the left arrow button ONE time, until the “US” is blinking (here is where we need to change the daylight savings function from standard daylight savings to the new legislation.)

Step 11

Press the up arrow button until you see “US7” on the LCD screen

Step 12

Press the “SELECT/SAVE” button

Step 13

Press the “MENU” button

(at this point you should be back at the main screen, and the change has been made)

Please if you have any question please contact,
Spectrum Lighting, 262-970-0300, or
Leviton Lighting Controls, 800-864-2502.
